Paris - France

As a recent computer science graduate with a hybrid skill set, I have a strong technical background. I am currently looking for stimulating opportunities that will allow me to explore my curiosity and take on new challenges. I invite you to check out my GitHub, where you can find all of my projects.

EDUCATION

Masters in Studies and Consulting — IT Projects and Business Strategies

Paris Cité University

- Information Systems and Business Strategy (IT Infrastructure and Networks).
- Networks: Routing and on-premises device configuration, system administration
- Project Management: Project Owner (MOA), Agile SCRUM / KANBAN methodology.
- Programming: C, Python, PHP, C#, Java.
- Database Management: Oracle, PostgreSQL, MySQL, XML
- Data Mining: Data collection, spatial and textual analysis, and predictive analysis (using R)

Bachelor's Degree in Management - French-English International Track

University of Paris Nanterre

- Statistical Tests and Probability & Statistics Applied to Management.
- Introduction to Computer Systems and Databases Using VBA.
- Study of the English Language and the Anglo-Saxon World in a Political and Financial Context.

TECHNICAL SKILLS

Low-Code / No-Code :

- Business Application Development (Power Apps)
- Workflow Automation (Power Automate).

Programming :

- Software & Backend Development: Python, Java, C
- Web Development: PHP, Python
- Databases: Modeling, querying, and administration (SQL)
- Data Analysis: Statistical processing and analysis (R, Python)

Network & Security :

- Configuration and administration of switches and routers (Cisco, HP, etc., depending on the brands used).
- Network diagnostics and incident resolution (Troubleshooting / Debug)

Systems administration :

- Unix/Linux System Administration
- Scripting and Automation (Bash/Shell)
- Data Processing and Log Parsing
- Remote Administration (MobaXterm, CLI environments)

IT Architecture and Design:

- Design of software architectures (monolithic, n-tier, microservices).
- Data architecture: ETL modeling, data warehouse, data lake.
- UML modeling and business process diagrams.

Governance & Strategy:

- Enterprise architecture frameworks: TOGAF, COBIT, ITIL.
- IT/business alignment and corporate strategy.

Project Management:

- Proficiency in Agile methodologies (Scrum and Kanban) for leading teams and optimizing project delivery.
- Experience managing and tracking projects using Jira and Confluence (task management, documentation, reporting).
- Ability to organize sprints and progress meetings and facilitate cross-functional collaboration.

WORK EXPERIENCES

Business Automation Developer, Geodis Interservices

Levallois, FRANCE
Sept 2025 - Today

- Creating automated workflows with Power Automate.
- End-to-end business process automation (acquisition, extraction, processing, delivery).
- Integration of an AI-based OCR module for multilingual use on a global scale.
- Ensuring RPA robots comply with regulations.
- Assisting with the management of automation projects using Agile business analysis methods.
- Monitoring technological developments in development, automation, and AI tools.
- Interpersonal skills: Interdisciplinary communication, excellent collaboration, versatility, analytical thinking.

Systems & Network Technician, Logial COOP

Alfortville, FRANCE
July 2025 - Sept 2025

- DELL Server Configuration: Deployment of Hyper-V and independent storage.
- Contributed to the installation and configuration of a DELL server cluster and its storage.
- Contributed to the migration from Exchange Server to SharePoint.
- Provided technical support for physical network hardware (switches/routers) and debugging.
- Interpersonal skills: versatility, curiosity, analytical thinking.

ADDITIONNAL INFORMATION

- **Introductory Aviation Certificate – Highest Honors: Solid knowledge of aviation, cartography, and flight operations.**
- **TOEIC English: 980/990 (C1 level, bilingual).**
- **1st Dan Black Belt in Judo; French University Championship (discipline, professionalism, stress management).**
